OLIMAG SAND inc. 2899 BLVD. Frontenac East Thetford Mines (Quebec) Canada G6G 6P6 Tel. : (418) 338-3562 E-MAIL: info@olimag.com

JETMAG® SYNTHETIC OLIVINE PYROXENE SAND FOR BLAST CLEANING

ADVANTAGES:

- Excellent sanding quality with a highly competitive cost / performance, fast execution and reduced sand consumption.
- Its chemical and mineralogical composition makes JETMAG® a non-toxic, non-hazardous product for an improved workplace quality for users
- ➢ Has les than 1% of free silica.
- > Produce a safe and limited dust work environment, great productivity in enclosed spaces
- Reduce cost of waste management due to its lighter weight
- > Can be recycled 3 to 4 times with adequate recycling system in place

OUR STANDARD GRANULOMETRY

JETMAG	DEPTH OF CAVITIES IN 1/1000 OF AN INCH	MAIN USAGES	
16-60	4 to 6	Hard rust, painted and rusted steel, premetallization, deep cavities, boat and bridges surfacing, concrete	
30-60	2.5 to 4	Acier peint ou rouillé de structure, équipements industriels, machinerie lourde, camions	
32B4	2 to 3	New and painted steel, light rust, trucks, wheels	
35-70	1.5 to 2.5	Automotive (car body shop), light cavities, new steel, stainless steel	
60-B2	0.5 to 1	Stainless steel, fiberglass, aluminum, wood	

Chemical analysis		Physical properties	
ELEMENTS	% weight		
Mg0	38 to 42	Specific gravity : 2.8 – 2.9 g/cc*	
Si0 ₂ *	39 to 47	Density : 78 à 82 lbs/pi ^{3*} (1.25 to 1.31 g/cm3)	
Fe ₂ 0 ₃	7 to 10	Angular shape particles	
AL ₂ 0 ₃	0.3 to .13	Water absorption: absorb no humidity	
Ca0	0.8 to 1	Hardness : 7 À 7,5 on the Mohs scale	
Others	1 to 2	* Upon granulometry	

* More than 99 % of the silica is chemically link to magnesium with less than 1 % de free silica.
